Erratum

Peter Babinec a,b,* , Elena Jakubíková c, Jerzy Leszczynski b

a Department of Biophysics and Chemical Physics, Comenius University, MFF UK, Mlynská dolina Fl, 842 48, Bratislava, Slovakia
b Department of Chemistry, The Computational Center for Molecular Structures and Interactions, Jackson State University, Jackson, MS 39 217, USA
c Department of Chemistry, Colorado State University, Fort Collins, CO 80 523, USA

In the original paper we have by mistake omitted the name of one of the coauthors Elena Jakubíková. Therefore the correct full citation of this paper should be:

Peter Babinec a,b,* , Elena Jakubíková c, Jerzy Leszczynski b

a Department of Biophysics and Chemical Physics, Comenius University, MFF UK, Mlynská dolina Fl, 842 48, Bratislava, Slovakia
b Department of Chemistry, The Computational Center for Molecular Structures and Interactions, Jackson State University, Jackson, MS 39 217, USA
c Department of Chemistry, Colorado State University, Fort Collins, CO 80 523, USA

On page 982, line 20, the following sentence should be added:

Recurrence plots of the time series presented in this article were obtained using “Visual Recurrence Analysis” program [10].

Corresponding citation should read:

On page 983, caption for Fig. 2 should read:

Fig. 2. Time dependencies of the first normal mode coordinates (left column)–see also Ref. [4], their Fourier transforms (middle column) and RPs of the third normal mode coordinates (right column) for various amounts of energy $\sum_{i=1}^{3} h\nu_i$ supplied to the normal modes: (a) $\nu = 0.5$; (b) $\nu = 0.75$; (c) $\nu = 1.5$; (d) $\nu = 2.5$. The thresholds $\delta_l = 0$, $\delta_h = 1/10$ of the maximal $(i, j)$ distance, are used in all RPs.
Recurrence plot shown in the right column of Fig. 2(d) should be replaced by the following plot:

All the conclusions reached in this paper remain valid and are not altered by these misprints. We apologize for any inconvenience and we would appreciate your help in publishing this erratum.

Thank you for your understanding
Peter Babinec.
